artemshar | artemshar

Summary

Product-minded Full-Stack Software Engineer with **9+ years of commercial experience**, working on real-world applications from **Backend APIs to Frontend UIs.**

I've worked with both **early-stage startups** and **large international cross-functional teams** (outstaffing/agency environments), delivering scalable features, improving architecture, and adapting quickly to changing business needs.

Core strengths:
- Languages: TypeScript, JavaScript, Python
- Backend: Node.js, Express, NestJS, Django, Strapi, PostgreSQL, Prisma, REST APIs
- Frontend: React, TanStack, Redux, Next.js, Vite, Webpack, Gulp, Tailwind CSS, HTML/CSS/SCSS
- DevOps & Infrastructure: Docker, Git, GitHub/GitLab, NGINX, Linux/WSL, Bash, DigitalOcean
- Testing & CI/CD: Jest, Playwright, GitHub Actions, GitLab CI
- and a lot of others tools, that help solve business challenges in web development

Collaborative, business-aware developer focused on building systems that are both user-centric and technically sound. A long-term strategy and relationships are always a priority in any collaboration for me.

Experience

Self-Employed / B2B Software Engineer (Remote, Contract-Based) — **June 2023 - Present**
Full-Stack / Front-End / Game Developer — Serbia (remote)
https://artemshar.space

LexiconLabs AI **(Client: Aleslim - Nutrition company)** | Contract
Full-Stack & Product-Focused Developer | Jan 2025 – May 2025

- I significantly improved MPV and implemented a new frontend design and features for a quiz platform and nutrition web app for Aleslim. Aleslim is a pocket nutritionist with features like detailed food analysis by photo, recipes, consultations, and support for multiple languages. It was built using a modern web stack and UX principles with an LLM's under hood
- I integrated Analytics with PostHog and implemented A/B testing

Nocodered – Digital Agency | Hourly rate freelance
Full-Stack Developer | Jul 2024 – Jan 2025

- Led development for multiple client projects, acting as the primary technical contact
- Designed scalable APIs, handled architectural decisions, and conducted feature analysis and delivery
- Built a middleware service integrating systems from two companies in the home maintenance industry (Node.js, TypeScript, REST APIs)
- Improved performance, SEO, and UI for a restaurant portal and blog (Next.js, React, TypeScript)
  → vkusonomika.ru/dubai
- Organized internal dev processes: Git workflows, CI/CD pipelines, and team communication practices

Freelance Game Development (SoftSwiss)
Frontend Engineer | Jun 2023 – Oct 2023

- Developed and maintained casual browser-based games using a Unity-like editor and Pixi.js
- Built a reusable HUD (UI system) applied across a game catalog
- Improved internal admin panel UX/UI (React, TypeScript, CSS), streamlining operations for company employees

Oken Technologies — Eye-tracking productivity tool (startup) — **Sep 2022 - Nov 2022**
Front-End Developer — remote
https://oken.tech

Worked on an early-stage ML-powered eye-tracking productivity tool as part of a small startup team.

- Built core features for the Chrome extension (React, TypeScript), including a Pomodoro timer and Mixpanel-based usage analytics
- Refactored the UI from legacy CSS to Styled Components and Web Components for better maintainability
- Integrated real-time communication using WebSockets between the extension and backend services

Clay.Global – UI/UX Design Agency — **Jul 2021 - May 2022**
Front-End Developer — Saint-Petersburg (office)
https://clay.global

Worked as a core developer on high-profile design-to-code projects, collaborating closely with top-tier designers.

- Led frontend development of the Reyes Holding corporate website from the ground up (desktop and mobile versions):
  → Built a few **main pages, scalable, reusable React components** based on Figma design mockups
  → Implemented **UI animations** and interactive elements to match modern brand guidelines
  → Improved **accessibility** to meet **WCAG certification** standards
- Created and maintained an internal **Storybook library** for UI components and shared utilities, improving dev efficiency across the team

Stack: React, TypeScript, Next.js, SCSS, Storybook

Unicorn Platform – Website builder for startups — **Jun 2020 - Jun 2021**
Front-End / Full-Stack Developer — remote
https://unicornplatform.com

Contributed to the development of a succesefull **no-code website builder** used by startups and businesses (~ 100k total users, more then 1k paid users). Played a hybrid role across **frontend and backend**, delivering product features used daily by end users.

- Designed and implemented the **blog functionality**: rich-text post editor, article publishing, and website embedding
- Integrated **Google Sheets API** to collect and manage user-submitted form data
- Developed a **template system** enabling users to create and reuse website sections
- Collaborated directly with the **founder** on **feature discovery**, prioritization, and iteration
- Handled **customer support tasks**, user feedback, and bug fixing in a fast-paced startup environment

Stack: TypeScript, React, Redux, CSS, Python, Django

Emergn – IT Consulting & Development Services — **Jun 2018 - May 2020**
Front-End Developer — Saint-Petersburg (office)
https://www.emergn.com

Worked for 2 years in a corporate environment as part of the **UX/UI/UXD department**, delivering production-grade frontend solutions for enterprise clients across travel, retail, and finance sectors. Gained deep experience working under formal processes, design systems, and cross-team collaboration.

Hotelplan Group:

- Developed the UI for a **new travel platform** from scratch using **React, Next.js, TypeScript, JSS**
- Delivered UI improvements and bug fixes for existing travel products, including **Migros-Ferien**

Mercer (Financial Analytics)

- Participated in the refactoring of a legacy financial analysis system, **migrating from Flash to Vue.js 2.0** (.NET on backend)
- Rebuilt interactive dashboards and ensured UI consistency across modules

Internal Emergn Projects

- Proposed and implemented **architectural improvements**, modularizing legacy UIs into reusable component libraries
- Migrated build system from **Grunt** to a modern toolchain: **Next.js + Webpack**, improving dev speed and maintainability
- Collaborated with backend engineers to improve frontend-backend integration and **refactored legacy code for performance and UX**
- Participated in client communication: requirement clarification, feasibility discussions, and reviews

Stack: React, Next.js, Vue.js 2.0, TypeScript, JSS, SCSS, Webpack, Grunt

Game Dev 2D – Indie Game Startup — **Jun 2017 - May 2018**
JavaScript, Pixi.js Game Developer — remote

Contributed to a small 2D game development project with a focus on user interface, animation, and tool integration for production support.

- Developed UI and HUD elements using **Pixi.js** and **CSS/JavaScript animations**, bringing interactivity and motion to both game screens and external pages
- Managed and integrated **game assets** (audio, sprites, text) into the rendering pipeline
- Wrote **internal documentation** for asset pipelines and developer onboarding
- Created a **Telegram chatbot** (Node.js) integrated with **Google Sheets** to assist with game data input and testing workflows

Stack: Pixi.js, JavaScript, CSS, Node.js, Telegram API, Google Sheets API

Grand Capital - Trading and invest platform — **Oct 2016 - May 2017**
Junior Front-End, HTML / CSS Developer — Saint-Petersburg (office)
https://grandcapital.net

Started career as a frontend developer working on marketing tools and internal web products.

- Developed **HTML/CSS email templates** for promotional newsletters and product updates
- Contributed to **UI improvements** on company web pages using **HTML, SCSS, AngularJS**
- Collaborated with backend developers working in **Django** to ensure consistent integration and styling across pages

Key skills

TypeScript	**React**	**Tailwind CSS**	**REST API**	**Next.js**
Node.js	**JavaScript**	**UI / UX**	**Docker**	**Problem Solving**
Git	**Agile, SCRUM**	**Nest.js**		

Education

Saint Petersburg State Institute of Technology (Technical University) **2014 - 2017**
Business-Informatics (Business and Computer Science) Bachelor's degree
https://technolog.edu.ru/index-eng

Studied at the intersection of **IT, business, and analytics**, with a focus on applying modern technologies to real-world business processes.

- Core subjects: **Databases**, **Programming**, **Enterprise IT Systems**, **Business Process Modeling**, **Innovation Management**
- Gained a strong foundation in **economics**, **strategic management**, and **IT service operations**

Graduated with practical skills in both software and systems thinking, enabling collaboration across technical and business teams.

College of St. Petersburg State University of Film and Television **2010 - 2014**
Audiovisual technology (Cinama projectionist)
https://en.gikit.ru

Studied audiovisual and cinema projection technologies with hands-on experience in sound and image systems.

- Trained in **film projection systems**, audio-visual equipment, and cinema operations
- Gained creative experience as a **sound designer** and **electronic music artist**
- Worked as an **informatics lab assistant**, supporting hardware and software maintenance for college IT classes

Volunteering

Solvery.io **Jan 2023 - Feb 2023**
Education Mentor / Front-End Remote
https://solvery.io/

Mentoring Junior / Middle Front-End Developers.

Projects (personal, educational)

AI Awesome
AI tools showcase
https://artemshar.space/awesome-ai/showcase/

Open source, curated list of AI tools, platforms, and resources for developers, creators, and businesses. Showcase with search and filters by tags.

ai, opensource

Vocaboard **Nov 2023 - Present**
Learning languages
Vocaboard.com

- Created vocaboard.com, a toolset for learning foreign languages.
- Led all aspects: UX / UI design, Product Management, research and development
